Councilman Speck,

On Thursday night, you agreed to "amend your motion as passed on Nov. 12th."

Amending the Nov. 12th motion, to include what the City Council unanimously agreed to on Oct. 29th, is all Alexandrians Against A Highway Connector are asking the City Council to vote for today. Nothing more and nothing less. Today's recorded vote must carry equal weight as the Nov. 12 motion.

If you will not offer the motion to amend, I respectfully request other City Council Members to offer it themselves.

To reiterate the language you agreed to Thursday night, and to what Council Members Cleveland, Eberwein, Euille, Pepper, Woodson subsequently said they could agree, I am resubmitting the following for your action today:

"The two-lane roadway connections under study by the city transportation staff must be bound by covenants so they may not be expanded."

Thank you in advance,

Lou Cordia

Dear Lou,

Let's be sure there is no misunderstanding. At some point during tomorrow's meeting, probably after we have finished with docketed business, I will enter into the record, the sense of this Council that if two lane connectors are considered, they will have covenants to not expand. I have no plans to start amending the previous motion.

David Speck
